South Gate Inn Online Reservation System is built to bring ease and efficiency to both customers and hotel owners. It's a huge advantage to have hotel reservation software because this can save tons of time, provide the best service for the customers and

boost your competitive edge over other hotels with a reservation system. Having this system, customers can make a reservation in less than 2 minutes (*in real-time*). If you travel a lot and wish to stay at **South Gate Inn**, it is possible to make a reservation with just a few clicks, that's how fast it is. Customers can view the content of the site and they can choose the room of their desire, it's hassle-free and easy to access. Then, an instant confirmation message will appear in his account once they are done filling up the reservation form.

These are the following features of the system:

Admin Side

- **Rooms**
 - **List**
 - **New**
 - **Update**
- **Accommodations**
 - **List**
 - **New**
 - **Update**
- **Reservation**
 - **Confirmation**
 - **Guest details**
 - **Guest Reserved Rooms**
- **Reports**
- **Manage User**
 - **List**

- **New**
- **Update**
- **Login and Logout**

Public Side

- **Home**
- **Check Availability**
- **Transaction**
 - **Booking of rooms**
 - **Reservation of rooms**
- **Room and Rates**
- **Accommodations**
- **Contact us**
- **Profile**
- **Login and Logout**

This **Online Reservation System** was developed using **PHP, MySQL Database, HTML, CSS, Javascript, Bootstrap**, and some other libraries. The source code is free to download on this website. Feel Free to Download and Mofity it the way you desire.

How to Run ??

Requirements

- **Download** and **Install** any **local web server** such as **XAMPP/WAMP**.

- **Download** the provided source code **zip** file. (*download button is located below*)

Installation/Setup

1. **Open** your **XAMPP/WAMP's Control Panel** and start **Apache** and **MySQL**.
2. **Extract** the **downloaded source code zip file**.
3. If you are using **XAMPP**, **copy** the extracted source code folder and **paste** it into the **XAMPP's "htdocs" directory**. And If you are using **WAMP**, **paste** it into the **"www" directory**.
4. **Browse** the **PHPMyAdmin** in a **browser**. i.e. **http://localhost/phpmyadmin**
5. **Create** a **new database** naming **southgatedb**.
6. **Import** the provided **SQL** file. The file is known as **southgatedb.sql** located inside the extracted source code folder.
7. **Browse** the **Simple Membership System** in a **browser**. i.e. **http://localhost/southgateinn/SouthGateInn** for the public/client-side and **http://localhost/southgateinn/SouthGateInn/admin** for the admin side.

Admin Default Access:

Username: **admin**

Password: **admin**

DEMO

8. Datei **initialize.php** unter **SouthGateInn\includes** anpassen.

wenn das Installationsverzeichnis nicht das Standard
http://localhost/southgateinn/SouthGateInn ist
sondern
wie z.B. *http://localhost/0_x32/southgateinn/SouthGateInn*

ändere die Zeile 15 in

```
defined('SITE_ROOT') ? null : define ('SITE_ROOT', $_SERVER  
[ 'DOCUMENT_ROOT' ].DS.'0_x32'.DS.'southgateinn'.DS.'SouthGateInn');
```

There you go! You can explore the features and functionalities of this **Online Reservation System** using **PHP** and **MySQL Database**. I hope this will help you with what you are looking for and for your future PHP Projects.

For all students who need a programmer for their thesis system or anyone who needs a source code in any programming language. You can contact me @

Enjoy :)

Note: Due to the size or complexity of this submission, the author has submitted it as a

.zip file to shorten your download time. After downloading it, you will need a program like Winzip to decompress it.

Virus note: All files are scanned once-a-day by SourceCodester.com for viruses, but new viruses come out every day, so no prevention program can catch 100% of them.

FOR YOUR OWN SAFETY, PLEASE:

1. Re-scan downloaded files using your personal virus checker before using it.
 2. NEVER, EVER run compiled files (.exe's, .ocx's, .dll's etc.)--only run source code.
